## **Historical Events of POCL**

Padma Oil Company Limited is not only the biggest but also the oldest with its antecedents stretching well back to the colonial period of British-India. Its ancestral enterprise 'Rangoon Oil Company' established petroleum business in this part of the world by the middle of nineteenth century. Following is a Synopsia of Padma Oil Company Limited's historical background:

- In 1874, Rangoon Oil Company was registered as a joint stock company in Scotland having its main business activities in Burnes (Known to the British until the later years of the 19th century as BURMAH, which was a province of the then British India)
- In 1886, Rangoon Oil Company was reconstituted and reformed as Burmah Oil Company. Business of this Company was then spread over other provinces of British-India including Assam and Bengal. The Company's Head office was at 181 West George Street, Glasgow, U.K.
- Burmah Oil Company for the first time introduced drilling equipments for exploration of oil in Burma in the year 1868. Previously oil was being collected in Burma by hand dug well.
- Burmah Oil Company established their 'Moheshkhal Oil Installation' at Chattogram in the year 1903.
- In 1908, Burmah Oil Company conducted a geological survey in Chattogram.
- ▲ In 1914, Burmah Oil Company drilled a well at Sitakunda, Chattogram.
- ▲ In the year 1920, M/s Bullock Brothers, a major distributor of Burmah Oil Company established their trading office at Sadarghat, Chattogram.
- In the year 1929, Burmah Cil Company took over the office of Bullock Brothers at Sadarghat, Chattogram including 4.1 acres of land and established their own office in it.
- Prior to the partition of the sub-continent in 1947, mainly two oil marketing companies namely Burmah Oil Company (BOC) and Burmah Shell Oil Storage and Distribution Company (BSOC) were operating Petroleum business in the area what now comprise Bangladeah. Burmah Shell established Aviation Depot at Teggaon Airport in the year 1948.
- Considering the Oil Marketing situation in eratwhile East Pakistan, Burmah Shell transferred their share to BOC and in the year 1966 a new company called Burmah Eastern Limited was formed with 49% share of BOC. The rest portion of the share was issued to public & private individuals of Pakistan.
- ▲ In 1977, Burmah Eastern Limited became a subsidiary of Bangladesh Petroleum Corporation:
- In the year 1985, BOC transferred its entire property in Bangideah (including share of Burmah Eastern Limited) in favour of Bangiadeah Petroleum Corporation (BPC).
- As per terms of the transfer of BOC's entire share to BPC, Barmah Eastern Limited was required to change its name and as such subsequently the Company's name was changed as PADMA OIL COMPANY LIMITED' in the year 1988.

According to Bangladesh Bureau of Statistics (BBS)'s estimate, the economy grew at 8.15% in FY 2018-19, which is 0.29 percent higher than the GDP growth rate of 7.86% achieved in the previous fiscal year. Another success of the government was to bring down the annual average inflation to 5.45% in the reported year while the official target was 5.60%. The economy of Bangladesh continued its growth in all important sectors in FY 2018-19. Fuel price was stable throughout the country during the reported fiscal year, and the total sale of petroleum products in the country. through the subsidiary companies of Bangladesh Petroleum Corporation was 65.50 lec metric tons. Due to the operation of diesel-based power plants by Equation natural cas(LNG) in the country, the use of dissel in the power sector was significantly reduced during the year under review. As a result, total sales of petroleum products in the country were decreased by 5.73% in FY 2018-19 compared to the last fiscal year. The demand of patroleum products is increasing steadily due to rapid increase of activities in industry, commerce, agriculture and transport sector towards the development of the country's economy. The estimated demand for petroleum products in the country has been set for 70.50 lac metric tons for the FY 2019-20.

#### Business Performance in FY 2018-19 :

it appears from the business outcome that the seles volume of the Company's petroleum products stood at 22,61,189 metric tons in FY 2018-19 which was 23,66,453 metric tons in FY 2017-18. The Company's sale of diesal reduced by 1,63,122 metric tons !.e. 52.00% In power sectors in FY 2018-19 compared to the last year as the demand for diesel has decreased drastically due to the use of gas in diesel-based power plants. Besides, the operational activities of Barishal Barge depot were closed for the entire year for repair works of barges, as because of that sales of diesel of at the said barge depot decreased by 22,696 metric tons in comparison to the previous year. Consequently, overall sales of diesel oil dropped by 1,15,995 metric tons or 7.94% in FY 2018-19 compared to the previous year. Further, due to import of furnace oil by private sector the sales of furnace oil decreased by 38,578 metric tons i.e. 16.20% over the last year. As a result, total sales of petroleum products decreased by 4.45% than that of the last fiscal year. Among the marketing companies under BPC, the market share of the Company was 34.53% and the Company ranked second position in the industry in FY 2018-19.

### ২০১৮-১৯ অর্থবাহর কোম্পানির উল্লয়নমূলক কাজের অঞ্চাতি :

কোম্পানির ব্যবসা সম্প্রসারণের জন্য বেশ কিছু প্রকল্প গ্রহণ করা হরেছে। কোম্পানি কর্তৃক পৃথীত বিভিন্ন প্রকল্পসমূহ বাভবারনের কাজ এসিরে যাজে। যোগো বন্দর সংলগ্ন বিশিসির ১৭ একর জারগার উপর ১ লক্ষ্ণ হে,টন ধারণক্ষমভা সম্পন্ন তেল ছাসনা নির্মাণের কাজ সমার্ভ হরেছে এবং গভ মার্চ, ২০১৬ বেকে কোম্পানির মোগো ভিসোর পরিচালন কার্যক্রম ভক্ত হরেছে।

of the company's main agrochemicals product Furadan, the total sales of agrochemicals products of the Company have declined compared to the last year. Among the products marketed by the Company, Furadan is the highest-selling product, which is 37% of total sales of agrochemicals products of the Company. Earlier, Furadan 5G was produced at the Company's plant by importing 'Carbofuran 85 DB' from 'FMC AG America', the main ingredient for formulating such granular pasticides. Since it was produced at the Company's plant, the profit of the product is relatively high. But at present, Furadan's production has been stopped as the manufacturers stopped the production of 'Carbofuran 85 DB'. Because of that, the sale of Furadan decreased by 1295 metric tons i.e. 52.84% in FY 2018-19 in comparison to the previous year. The Company's total sales of agrochemicals products stood at 2,394 metric tons in FY 2018-19 showing a decline of 32,94% as against 3,570 metric tons in last fiscal YGEF.

Due to lower growth in the sales volume of the Company's principal business of petroleum products and non-operating income compared to the previous year, the Company's profit before tax decreased by 14.85% to Taka 381.03 crore in the correspondence year from Taka 448.02 crore of the last fiscal year. Eaming per Share (EPS) stood at Taka 29.07 in the reported year, as against Taka 34.18 of the last year.

Various steps have been taken by the Company to increase the sales volume of petroleum products and to mitigate operating loss of agrochemicals business. Auto gas (LPG) marketing activities are being undertaken at the filling stations under the Company's marketing network nationwide along side petroleum products, in order to mitigate the operating loss of agrochemicals business, appropriate steps are taken to reduce the overall operating expanditure by reviewing the current market segment and closing the offices of the comparatively less selling regions by consolidating with adjacent offices, and by reorganizing the manpower.

#### Progress of Development Works in FY 2018-2019:

Several projects have been adopted to expand the Company's business. Work is underway to implement various projects adopted by the Company. The construction of 1.00 lec MT storage capacity Mongla Oil Inetallation on 17-acres land of BPC adjoining Mongla Port has been completed and the operation activities of the Company's Mongla depot have begun from March, 2019.

metric tons, which incressed to 65.50 isc metric tons in FY 2018-19. Due to the operation of diesel-based power plants by liquetied natural gas (LNG) in the country, the use of diesel in the power sector was significantly reduced during the year under review. As a result, total sales of petroleum products in the country decreased by 5.73% to 85.50 lac metric tons in FY 2018-19 from 69.48 lac metric tons of the last fiscal year. From economic parspective of view, to meet the demand of a whole import-dependency of fuel oil regulres foreign exchanges that have huge impact on country's macro economy. In order to meet the demand of fuel oil in the country 48.01 lac metric tons refined fuel oil and 13.58 lac metric tons of crude oil were Imported from abroad in FY 2018-19. It can be mentioned here that crude oil is refined in the country's only one oil refinery Eastern Refinery Limited. Besides, 5.15 lac metric tons fuel oil was produced by various gas fields under public sector and different fractionation plants under private sector. In that, it was 2.20 lac metric tone from government gas fields and 2.95 lac metric tons from private fractionation plants.

#### (b) Agrochamicals Sector of the Country:

There is no atternative to increasing agricultural production in this country of agro based economy. It is essential to use modern agricultural inputs such as high bread seeds and fertilizer as well as pesticides to increase production. In order to meet the food demand of the country's growing population, there has been created a market of pesticides along with modernization of agriculture. More than 380 both domestic and multi-national companies including Padma Oil Co. Ltd. have been marketing various types of pesticide products in this country which are contributing significantly to the production and preservation of agricultural crops. The sale of agrochemicals products in agrochemical industry in 2018-19 fiscal year was about 34,500 metric tons which was 38,000 metric tons in the last fiscal year, in that, Padma Oll Company Limited's sales figure was 2394 metric tons.

The Padma Oil Company Limited has been importing and distributing the best products of the world's best chemical manufactures (FMC-America, BASF - Germany, Mitaublahi - Japan, Heliz - Srilanka, Riceco - India, Rasayan -India, Nanjing-China) being contracted with them using its own image and product brand image including 11 products registered with the Company's own name as well. Currently, the Company is marketing 36 nos pesticide and fertilizer product.

Agrochemical posticides are playing a vital role in Bangladeah agriculture. Several research studies have shown that use of chemical posticides contributes significantly to increase the productivity and production of agricultural products.

#### Company's Business performance : 2018-19

#### (a) Petroleum Products

The Company's total sale of petroleum products was 22,61,189 metric tons which was 23,66,453 metric tons in the last year. The Company's fuel oil sale decreased by 4.45% in FY 2018-19 over the last year. In the corresponding year, among the petroleum products, sales of Octane, Jet A-1, MS, LDO, Lube & Grease and Bitumen/LPG & others increased by 15.82%, 5.44%, 12.96%, 2.08%, 0.52% and 52.69% respectively compared to the last year. On the other part, during the year under review sales of Kerosone, Diesel, PO, JBO, MTT and SBP decreased by 5.82%, 7.94%, 16.20%, 30.66%, 6.63% and 25.76% respectively compared to the previous fiscal year.

The Company's sale of diesel was reduced by 1,63,122 metric tons i.e. 52.00% in power sectors in FY 2018-19 compared to last year as the demand for diesel has decreased drestically due to the use of gas in dissel-based power plants. Besides, the operational activities of Barishal Barge depot were closed for the entire year for repair work of barges, as because of that sales of dissel of at the barge depot decreased by 22.696 metric tons in comparison to the previous year. However, the operations activities of the above depot have been restarted since October, 2019. Consequently, total sales of diesal oil decreased by 1,15,995 metric tons or 7.94% in FY 2018-19 compared to the previous year. The main reason of the lower growth in total sales of petroleum products in FY 2019-19 over the last year due to reduction of sales of diesel in this year compared to the last year. Further, due to import of furnace oil by private power plants, the sales of furnace oil decreased by 38,578 metric tone i.e. 16.20% over the last year. Because of the increase in solar power consumption and electricity production due to electrification in the remote areas of the country, the sale of kerosene has been decreasing gradually. The JBO supply has been reduced due to the use of 'Food Grade' backing oil as an alternative to JBO In the production of jute products at various jute miles of the Company's listed customers.

#### (b) Agrochemicals Sector :

During the year under review, sale of the Company's agrochemicals products was 2,394 metric tons which

was 3,570 metric tone in the last year. The sale quantity of the Company's agrochemicals products decreased by 1176 metric tons i.e. 32.94% in 2018-19 fiscal year compared to the previous fiscal year.

Furadan is the highest-selling product, which is 37% of total seles of agrochemicals products of the Company. Earlier, Furadan 5G was produced at the Company's plant at Main Installation, Chattogram by importing 'Carbofuran 65 DB' from 'FMC AG America', the main ingredient for formulating such granular pesticides. Since it was produced at the Company's plant, the profit of the product was relatively high. But at present, Furadan's production has been stopped as the manufacturers stopped the production of 'Carbofuran 85 DB'. Because of that, the sales of Furadan decreased by 1295 metric tons or 52.84% in FY 2018-19 in comparison to the previous year.

It is mentionable here that Furadan 5 AG can be formulated through 'Carbofuran 98% technical grade' instead of 'Carbofuran 85 DB'. For that the Company's agrochemicals plant at Main Installation, Guptakhat, Chattogram is required to upgrade. For up gradation of the above plant, it will cost approximately take 1.00 crore and will take about one year to execute. But according to a decision taken by PTAC (Pesticide Technical Advisory Committee), the country's pesticide regulator, that carbofuran group's pesticide would not be imported in Bangladesh like other countries of the world after 2021. So that Furadan would not be marketed in Bangladesh after that time and hence it will not be possible to get profit after meeting the renovation cost within the year of 2021. It is mentionable here that in order to increase the sales of agrochemicals products, the Company has included 10 new products in the Company's marketing list as per recommendation of the company's agrochemicals division. In addition, activities are currently being undertaken to market granular Figronii products as alternative to Furadan, Besides, due to the acrochemicals business being very competitive, the sales targets could not be achieve as expected.

Various steps have been taken by the Company to reduce the operating loss of the agrochemicals business. In order to mitigate the operating loss of agrochemicals business, appropriate steps are taken to reduce the overall operating expenditure by reviewing অকিসসমূছের সাথে একীভূতকরণ এবং জনবংশর পুনরবিন্যাসকরপের মাধ্যমে ব্যর নিয়ন্ত্রণ করে এ খাতে সার্বিক পরিচালন ব্যয় হ্রাসকরপের যথাবথ পদক্ষেপ এবণ করা হচেছ। কোম্পানি কর্তৃক গঠিত একটি কমিটির মাধ্যমে প্রতিযোগী কোম্পানিসমূহের সমজাজীয় পশ্যের বিক্ররমূল্য নিয়মিতভাবে পর্বাপোচনা ও ভদনুবারী সময়ে সময়ে পশ্যের বিক্রম মৃশ্য প্রয়েবিবার্থন জন্য কার্যক্রম এবদ করা হচ্ছে।

# MANAGEMENT DISCUSSION AND ANALYSIS ON COMPANY'S POSITION AND OPERATION

The financial and operating performance of Padma Oil Company Ltd. during the year 2018-2019 has been satisfactory. We made every effort to accomplish our job effectively and efficiently during 2018-19 fiscal year. We are focusing on the sustainability and efficiency.

It appears from the business outcome that the sales volume of the Company's petroleum products stood at 22.62 lac metric tons in FY 2018-19 which was 23.66 lac metric tons in FY 2017-18. The Company's sale of diesel reduced by 1,63,122 metric Tons I.e. 52.00% in power sectors in FY 2018-19 compared to the last year as the demand for diesel has decreased drastically due to the running of diesel-based power plants by Liquefied Natural Gas (LNG). Besides, the sale activities of Barishal Barge depot were closed for the entire year for repair work of barges, as such the sales of diesel oil at the barge depot decreased by 22,696 metric tons in comparison to the previous year. The operational activities of above depot have been resumed since October 2019. Consequently, total sales of diesel oil reduced by 1,16,995 metric tons in FY 2018-19 compared to the previous year. Further, due to import of furnace oil by private power plants the sales of furnace oil decreased by 38,578 metric tons or 16.20% over the last year. As a result, total sales of petroleum products decreased by 4.45% than that of the last fiscal year. However, volume of trade of the filling stations, agent/distributor and direct customers increased by 4% in FY 2018-19 compared to the previous year. Moreover, the Company improved its operational performance by achieving an operational gain of Taka 6.14 crore on petroleum products which was Taka 3.71 crore in the last year.

In addition, in the interest of sound financial management, the Company put greater importance on reducing the debtors account in FY 2018-19. In this context, the current liabilities of the Company decreased from take 15,700.02 crore in the previous fiscal year to take 15179.42 crore in the year under review. That is, the current liabilities of the Company in FY 2018-19 decreased take 520.60 crore compared to the last year. Nonetheless, the Company able to make a profit of Take 266.65 crore in the fund management sector as against Take 322.56 crore in the last year.

On the other hand, due to Intense competition in the agrochemicals business and the closure of marketing of the Company's main agrochemical product Furadan, the total sales of agrochemicals products of the Company have declined compared to the last year. Among the products marketed by the Company, Furadan is the highest-selling products, which is 37% of total sales of agrochemicals products of the Company. Earlier, Furadan 5G was produced at the Company's plant at Main Installation Guptakhai, Chattogram by Importing 'Carbofuren 85 DB' from 'FMC AG America', the main ingredient for formulating such granular pesticides. Since it was produced at the Company's plant, the profit of the product was relatively high. But at present, Furadan's production has been stopped as the manufacturers stopped the production of 'Carbofuren 85 DB'. Because of that, the sales of Furadan decreased by 1295 metric tons i.e. 52.84% in FY 2018-19 in comparison to the previous year. The Company's total sales of agrochemicals products stood at 2,394 metric tons in FY 2018-19 showing a decline of 32.94% as against 3,570 metric tons in the last fiscal year.

The overall Company's position has been reflected in the financial statements which have been prepared and presented in accordance with all generally accepted accounting principles. The overall Company's position and future planning, methods of preparation of financial statements have been summarized below:

durable and sustainable energy, power and transportation infrastructure in order to become a prosperous nation.

## Risk and Mitigation:

## Risk Factors of Petroleum Sector:

The economy of Bangladesh is growing faster and it creates an opportunity for the entire oil industry and power sector. There are some challenges in business of petroleum products such as market competition with private sector, open market economy, fluctuations of price of imported petroleum products etc.

## Risk Factors of Agrochemical Sector:

More than 380 companies including some giant multinationals are heading to grab the market of agrochemicals. There is a stiff competition in the agrochemical market. Besides, Bangladesh is among the most vulnerable countries to climate change, which poses a long-term threat to the country's agricultural sector, particularly in areas affected by flooding, saline intrusion, and drought. Price factors of our quality products are very much concern for us.

## Mitigation policy:

The Govt, of Bangladesh is emphasizing of enecting favorable rules and policy to attract the investors. We are monitoring to identify and assess the potential challenges and to find the way out to mitigate those challenges. Various steps have been taken by the Company to increase the sales volume of petroleum products and to mitigate operating loss of agrochemicals business. Auto gas (LPG) marketing activities are being undertaken at the filling stations under the Company's marketing network along with petroleum products nationwide. In order to mitigate the operating loss of agrochemicals business, appropriate steps are taken to reduce the overall operating expenditure by reviewing the current market segment and closing the offices of the lesser selling regions by consolidating with adjacent offices, and by reorganizing the manpower. It is mentionable here that in order to increase the sales of agrochemicals products, the Company has included 10 new products in the Company's marketing list as per recommendation of the Company's agrochemicals division. In addition, activities are currently being undertaken to market granular Figronii products as alternative to Furadan, Through a committee constituted by the Company, activities are being undertaken to regularly review the sale of homogeneous products of the competitive companies and to re-determine the selling price of the products accordingly. The management of the Company is regularly monitoring the inherent business risk and taking corrective measures.

## Future Planning:

A development program has been undertaken for business expansion and smooth supply of fuel to the public by establishing new depots, storage tanks and other physical infrastructures. A project of automation has been undertaken to modernize operational activities at the Company's Main Installation. The operational activities in various depots will also be modernize in phases. The Company's future plan is also acquisition and implementation of financing profitable projects in unused land at different places of the Company's owned land. The Company also has taken plan to build riverine permanent shore depots at Bhairab Bazar and Barishal in place of existing barge depots for increasing its current level sale of fuel oil and agrochemicals products and to increase its fuel oil storage capacity according to the demand. The Company is also adhering to improve its performance through specialization, differentiation, segmentation and overall diversification.

We are hopeful that we shall achieve our projected target and march forward in the years to come.

## Report on the Audit of the Financial Statements

## Opinion

We have audited the financial statements of Padma Oil Company Limited ("the Company"), which comprise the statement of financial position as at 30 June 2019, and the statement of profit or loss and other comprehensive income, statement of changes in squity and statement of cash flows for the year then ended, and notes to the financial statements including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Comapny as at 30 June 2019, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

## Basis for Coinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the company in accordance with the International Ethics Standards Board for Accountants' code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

## Revenue recognition - sale of goods

## Refer to note 22 and 3.10

## The key audit metter

Revenue recognition has eignificant and wide influence on financial statements.

Revenue is recognised when the amounts and the related costs are reliably measured, and the performance obligation is completed through passing of control to the customers. Revenue from the sale of goods is recognized when the company has delivered products to the customers at the shipping point and control has passed. The sales of the Company are derived from various depots located across the country with relatively transactions of small amounts. As a result, to obtain sufficient audit evidence, magnitude of sudit work and resource are required.

## How the matter was addressed in our audit

Our audit procedures in this area included, among others:

- We understood, evaluated and validated the key controls related to the Company's sales process from and to end, from contracts approval and algo-off, recording of sales, all the way through cash receipts and customers' outstanding balances.
- We tested the completeness of journal entries compared to financial statements and whether if there is any exception existed that the debit accounts of sales recognition were not related to cash and bank, trade receivables or advances from customers.

#### Plater to note 22 and 3.10

## The lesy suscit matter

We identified revenue recognition as a key audit matter because revenue is one of the key performance indicators of the Company and therefore there is an inherent risk of manipulation of the timing of recognition of revenue by management to meet specific targets or expectations.

We focused on the proper cut-off of select that the Company's customers due to the fact that the documents of confirming the acceptance of the products were provided by numerous customers based in different locations. There is a risk of differences between the timing of acceptance of the products by the Company's customers and when revenue was recorded. Accordingly, there could be potential misetatements that these revenue transactions are not recognised in the proper reporting periods.

## How the matter was eddressed in our audit

- We conducted substantive teeting of revenue recorded over the year using sampling techniques, by examining the relevant supporting documents including sales invoices and challans. In addition, we confirmed certain oustomers' receivable balances at the reporting date, selected on a sample basis by considering the amounts outstanding with those customers.
- Furthermore, we tested the sales transactions recognized shortly before and after the reporting date, including the sales returns recorded after that date, to examine whether sales transactions were recorded in the correct reporting periods.

## Trade Debtors' Recoverability

#### Refer to note 8 and 3.02

## The key audit matter

At June 30, 2019, trade receivables amounted to BDT 18,184,772,000, net of provision BDT 18,049,875,000.

The recoverability of trade receivables and the level of provisions for impairment of receivables are considered to be a significant risk due to the pervasive nature of these balances to the financial statements, and the importance of cash collection with reference to the working capital management of the business, so that we considered this to be a key audit matter.

## How the matter was addressed in our audit

Our audit procedures in this area included, among others:

- assessed the design and implementation of key controls around the monitoring of recoverability;
- challenged management regarding the level and againg of trade receivables, along with the consistency and appropriateness of receivables provisioning by essessing recoverability with reference to cash received in respect of diabtors. In addition, we have considered the Company's previous experience of bad diabt exposure and the individual counter-party credit risic
- critically assessed the recoverability of overdue receivables with reference to the historical levels of bad dabt expense and credit profile of the counterparties;
- tasted these balances on a sample basis through agreement to post period end involving and cash receipt; and
- considered the consistency of judgments regarding the recoverability of trade receivables made year on year to consider whether there is evidence of management blas through discussion with management on their rationals and obtaining evidence to support judgment areas.

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial

statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

in preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

## Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- --Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- -Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- -- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- -Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- -Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a mariner that achieves fair presentation.

—Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outwelch the public interest benefits of such communication.

## Report on Other Legal and Regulatory Requirements

In accordance with the Companies Act 1994 and the Securities and Exchange Rules 1967, we also report the following:

- a) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit and made due verification thereof;
- b) in our opinion, proper books of account as required by law have been kept by the Company so far as it appeared from our examination of those books;
- c) the statement of financial position and statement of profit or loss and other comprehensive income dealt with by the report are in agreement with the books of account and returns; and
- d) the expenditure incurred was for the purposes of the Company's business.

For a proper understanding of the financial statements, these accounting policies are set out below in one place as prescribed by the IAS-1 "Presentation of Financial Statements". The recommendations of IAS-1 relating to the format of financial statements were also taken into full consideration for fair presentation.

## 3.01 Property, plant and equipment

## 1.51.01 Recognition and measurement

All Property, Plant & Equipments except Freshold Land are initially accounted for at cost and depreciated over their expected useful lives in accordance with IAS-16. Cost includes expenditures that are directly attributable to the acquisition of the assets. The cost of self constructed /installed assets includes the cost of materials and direct labour and any other costs directly attributable to bringing the assets to the working condition for its intended use and the cost of dismantling and removing the items and restoring the site on which they are located.

On retirement or otherwise disposal of fixed assets, the cost and accumulated depreciation are eliminated, and any gain or loss on such disposal is reflected in the income statement which is determined with reference to the net book value of the assets and the net sale proceeds.

## 3.01.02 Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefit embodied within the part will flow to the company and its cost can be measured reliably. The costs of the day to day servicing of property, plant and equipment are recognized in Statements of profit or loss and other comprehensive income as incurred.

## 3.01.03 Depreciation

No depreciation is charged on freehold land and on capital work in progress. Depreciation is recognized in the statement of profit or loss and other comprehensive income on straight line method over the estimated useful lives of property, plant and equipment. Depreciation is charged from the month of addition when the asset is ready for use and no depreciation is charged from the following month of deletion. The principal annual rates are as follows:

Classes of assets	Rates of depreciation (%)
Lessehold land	3.5
Building	2.5-10
Plant & machinery	7.5-10
Vehicles	20
Furniture & fixtures	5
Others facilities	7.5-25

## 3.01.M Capital Work-in-Progress

Property, Plant and Equipment under construction/acquisition is accounted for and measured at cost as capital work-in-progress until construction/acquisition is completed and it is ready for use.

## 3.02 Financial Instruments

A Financial Instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

## (I) Non-derivative financial assets

The company initially recognizes accounts and other receivables on the date that they are originated. Financial assets include accounts and other receivables, advances, deposits and prepayments, investment in FDR and cash and cash equivalents.

## Accounts and other receivebies

Accounts and other receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, accounts and other receivables are measured at amortized cost using the effective interest method, less any impairment losses.

## ANNUAL REPORT 2018-2019

## Advances, Deposits and Prepayments

Advances are initially measured at cost. After initial recognition, advances are carried at cost less deductions, adjustments or charges to other account heads such as Property, Plant and Equipment, Inventory or Expenses.

Deposits are measured at payment value.

Prepayments are initially measured at cost. After initial recognition, prepayments are carried at cost less charges to profit or loss.

## Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, together with short-term, highly liquid investments that are readily convertible to a known amount of cash, and that are subject to an insignificant risk of changes in value.

## (II) Non-derivative financial liabilities

Liabilities (including liabilities designated at fair value through profit or loss) are recognized initially on the trade date at which the company becomes a party to the contractual provisions of the instrument. The company derecognizes a financial liability when its contractual obligations are discharged or cancelled or expire. Financial liabilities includes liabilities and accounts and other payables.

## Accounts and other payables

The company recognizes a financial liability when its contractual obligations arising from past events are certain and the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits.

## Other liabilities

Other liabilities represents the amounts due to various parties for receiving services. These are initially recognized at cost which is the fair value. After initial recognition these are carried at amortized cost.

## 3.03 Inventories

Major and minor petroleum products of BPC excluding Lubes and Greases are valued at net realizable value. Lubes, Greases and Agro-chemical products are valued at lower of cost or net realizable value. Stocks of stores and spares are valued at weighted average cost. Statutory charges (like Custom-duty or VAT) and freight attributable to Stock-in-trade are carried forward and added to the value of the stocks. However, cost comprises procurement cost and attributable overheads to bring the goods to their respective state at which they were on the reporting date.

## 3.04 Impairment

#### Financial Assets

Financial assets are impaired if objective evidence indicates that a loss event has occurred after initial recognition of the assets and that the loss event had a negative effect on the estimated future cash flows of that assets that can be estimated reliably.

Financial assets not classified as fair value through profit or loss, loans, receivables and investment in an equity accounted investee are assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

#### Non Financial Assets

The carrying amounts of the company's non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the recoverable amount of the asset is estimated. An impairment loss is recognized if the carrying amount of an asset or its related cash-generating unit (CGU) exceeds its estimated recoverable amount.

## 3.05 Employee benefits

Employee benefits are all forms of consideration given by the entity in exchange for service rendered by an employee.

## 3.05.01 Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

## 3.05.02 Post employment benefits

Post-employment benefits are employee benefits which are payable after the completion of employment. The company maintains both defined contribution plan and defined benefit plan for its eligible permanent employees.

## Defined contribution plan

The company has two contributory provident funds for its Junior and senior executives which were recognized on 30 June 1967 under the applicable Income Tax laws and regulations. Contribution to the fund is made equally by employee and employer @ 10% of basic pay for eligible permanent employees. The said funds are managed by Board of Trustees consist of four members. Assets of provident fund are held in a separate Trustee Funds as per the relevant rules and is funded by payments from employees and by the company. The company's contributions to the provident funds are charged as revenue expenditure in the period to which the contributions relate.

## Defined banefit plan

The company maintains a funded gratuity/pension scheme. Contribution to gratuity/pension fund for pension and/or gratuity benefits is made at the rate as determined on the basis of valuation certified by an actuary after every three years.

## Workers' Profit Participation Fund

The company also recognize provision for Workers' Profit Participation and Welfare funds (WPP & WF) @ 5% of its profit before charging such expenses as per Labour Act 2006.

## 3.05 Earnings per Share (EPS)

The company calculates its earnings per share in accordance with Bangladesh Accounting Standard IAS-33 "Earnings per Share" which has been reported on the face of Statement of Profit or Loss and Other Comprehensive Income.

## 3.05.01 Basis of Earnings

This represents profit for the year attributable to ordinary shareholders. As there is no preference dividend, minority interest or extra ordinary items, the net profit after tax for the year has been considered fully attributable to the ordinary shareholders.

# ANNUAL REPORT

## 1.05.02 Basic Earnings Per Share

This has been calculated by dividing the basic earnings by the weighted average number of ordinary shares outstanding during the year.

## 3.06.03 Diluted Earning Per Share

No diluted Earnings per share was required to be calculated for the year under review as there is no scope for dilution of Earnings Per Share for the year.

### 3.07 Statement of Cash Flows

Statement of Cash Flows is prepared in accordance with IAS 7 (Cash Flow Statement) and the cash flow from operating activities is presented under direct method.

## 3.05 Provisions, Contingent Liabilities and Contingent Assets

A provision is recognized in the Statement of Financial Position when the company has a legal or contractual obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Contingencies arising from claims, litigations, assessments, fine, penalties etc. are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Contingent assets are not recognized in the financial statements.

## 3.09 Taxation

#### Current tax:

Income tax expense is recognized in statement of profit or loss and other comprehensive income. Current tax is the expected tax payable on the total income for the year using tax rates enacted or substantially enacted as of reporting date and any adjustment to tax payable in respect of previous years. The company qualifies as a publicly traded company; hence the applicable tax rate is 25% for the year.

### Deferred tax:

Deferred tax liabilities are the amount of income taxes payable in the future periods in respect of taxable temporary differences. Deferred tax assets are the amount of income taxes recoverable in future periods in respect of deductible temporary differences. Deferred tax assets and liabilities are recognized for the future tax consequences of timing differences arising between the carrying values of assets, liabilities, income and expenditure and their respective tax bases. Deferred tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantially enacted at the Statement of Financial Position date. The impact of changes on the account in the deferred tax assets and liabilities has also been recognized in the statement of profit or loss and other comprehensive income as per IAS-12 "income Taxes".

#### 3.10 Revenue

In compliance with the requirements of IFRS 15: Commission earnings from sales of petroleum products are measured at fair value of the consideration received or receivable. Commission on petroleum products are determined by Government through official Gazette Notification issued from time to time. Revenue from the sale of agro-chemical products is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates.

Revenue is recognized when a performance obligation is satisfied in accordance with IFRS 15.

#### 3.11 Other Income

#### Other Income - operating

Other Income-operating includes land rent, service charges, filling and power station rent, POL products handling, and interest income on delayed payment. Other operating income are recognized as revenue income as and when accrued / realized.

#### Other Income - non-operating

Other income-non-operating includes interest income from SND and FDR, profit on disposal of assets and sale of scrap, interest from FDR and SND are recognized when accrued while profit on disposal of assets and sale of scrap are recognized as income when realized.

#### 3.12 Events after the reporting period

Events after the reporting period that provide additional information about the company's position at the date of statement of financial position or those that indicate the going concern assumption is not appropriate are reflected in the financial statements. Events after the reporting period that are not adjusting events are disclosed in the notes when material.

#### 3.13 Leagues

At inception of an arrangement, the company determines whether the arrangement is or contains a lease.

At inception or on reassessment of an arrangement that contains a lease, the entity separates payments and other consideration required by the arrangement into those for the lease and those for other elements on the basis of their relative fair values.

#### 3.13.01 Finance Lease

Leases in terms of which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. Minimum lease payments made under finance lease are apportioned between the finance expense and the reduction of outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant rate of interest on the remaining balance of the liability.

### 3.13.02 Operating lease

Leases that are not finance lease are considered as operating leases and the leased assets are not recognized in the company's Statement of Financial Position. Payments made under operating leases are recognized in profit or loss on a straight line basis over the term of the lease.

#### 43.00 Financial risk management

The Company management has overall responsibility for the setablishment and oversight of the Company's risk management framework. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies, procedures and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. The company has exposure at the following areas of risk.

- a) Credit risk
- b) Liquidity risk
- c) Market risk

#### 43.01 Credit risk

Credit risk is the risk of a financial loss to the Company if a customer or counterparty to a financial instrument falls to meet its contractual obligations, and arises principally from the Company's receivables. Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. In monitoring credit risk, debtors are grouped according to their risk profile, i.e. their legal status, financial condition, ageing profile etc. Accounts receivable are related to sale of petroleum and agro-chemical produced. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the statement of financial position. Credit sales as compared to the total sales are insignificant. Government institutions are allowed to purchase on credit.

#### 43.02 Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

### 43.06 Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to manage liquidity (cash and cash equivalents) is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Typically, the Company ensures that it has sufficient cash and cash equivalents to meet expected operational expenses, including financial obligations through preparation of the cash flow forecast, prepared based on time line of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date.

The following are the contractual or legal maturities of financial liabilities:

### 43.07 Market risk

Market risk is the risk that any change in market prices, such as foreign exchange rates and interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters.

#### 43.08 Exposure to currency risk

There was no exposure to foreign currency risk on the reporting date.

#### 43.09 Interest rate risk

Interest rate risk is the risk that arises due to changes in interest rates on borrowings. However the company do not have any outstanding bank borrowings on the reporting date thus they are not exposed to any interest rate risk. But the company has taken a losn from the Govt.of Bangladesh of BDT 110,078,000 with a fixed interest rate of 5 %.

## 44.00 Standards adopted but not yet effective

The Institute of Chartered Accountants of Bengladesh (ICAS) has adopted following new standards and amendments to standards. All previously adopted reporting standards are consistently applied by the Company to the extent relevant for the Company.

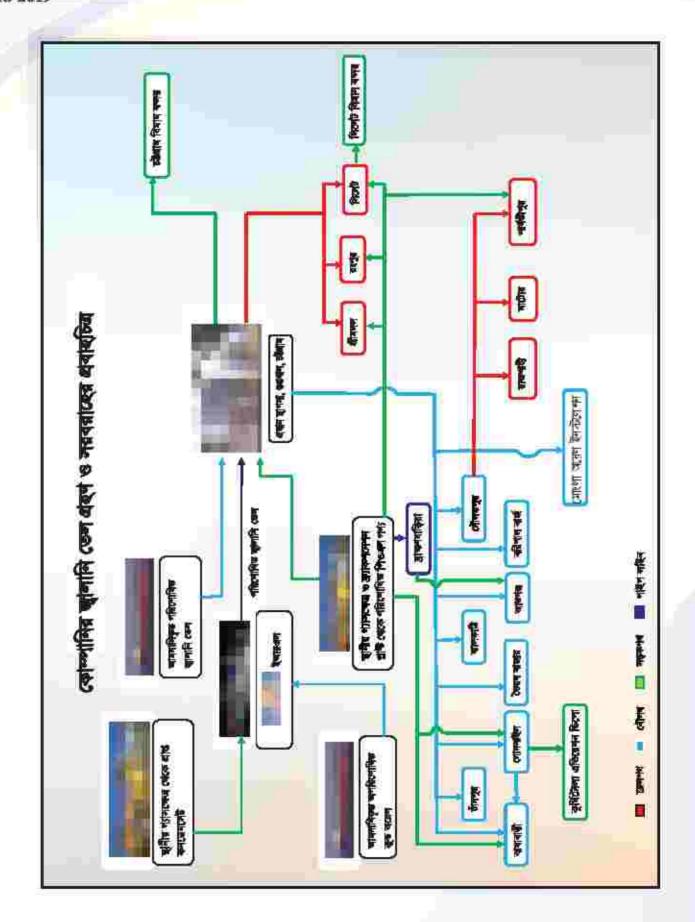

New standards	Summery of the requirements	Poseible impact on financial statements
IFRS 16 Lease	IFRS 16 specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single leases accounting model, requiring leases to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17.  IFRS 16 was issued in January 2016 and applies to annual reporting periods beginning on or after 1 January 2019.	The company is assessing the potential impact on its financial etatements resulting from the application of IFRS 16
